

IDsec staff have considerable hands-on experience in penetration testing, intrusion detection and protection, product integration and security consultancy.

These are brief profiles of some of our senior staff.

Dave Whitlow

Dave has over 10 years' experience in IT security, having carried out penetration testing, firewall and IDS projects for a range of customers, mostly in the finance and telecoms areas. He comes from a background of support, development and network management, with over 25 years in IT, and in 1997 was one of the founders of IDsec. Dave is a certified CISSP and manages the intrusion detection area of the business.

Stephen Bishop

Stephen has worked continuously in the computer security field since 1987, with TCP/IP and penetration testing experience dating back to 1995. He is the author of IDsec's Netwalk and Superwalk software and an occasional contributor to several public domain tools, with more than 50 major penetration tests to his name.

Kevin Graham

As IDsec's architecture and security design specialist, Kevin has a background in application development as well as technical consultancy. With wide experience of firewall and network deployment, he has also provided support for a number of penetration testing exercises, particularly at the network level.

Feel Good About Your Network

IDsec is an independent company specialising in network security. We can assess your security and advise on long-term protection: as we have for a range of blue-chip clients since 1997.
