

FortiGate™ -200-800 Series

Multi-Layer Security Appliances
for Mid-Size Enterprises

Datasheet

Complete Network and Content Threat Protection

Blended Security Threats

Network security threats are devastating to enterprise networks. Intellectual property, revenue, customer and company records, and other mission-critical resources are at risk. Unfortunately enterprise networks often lack adequate security solutions much less the human resources to recognize the business risks – that is until the damage is already done. Point-products providing security solutions for specific purposes may provide adequate protection against specific single-threaded threats, however a new breed of blended-threats and attacks utilize a multitude of attack vectors. Furthermore assembling an array of point products is costly and requires significant expertise to engineer, maintain and manage. Most small to medium size businesses cannot afford such overhead, yet should tragedy strike the potential business costs are enormous. Fortunately cost-effective, evergreen multi-threat protection is now available to businesses of any size. The FortiGate™-200 through -800 series of advanced security systems integrate all-in-one multi-threat protection into cost-effective plug-n-play security platforms that effectively block today’s blended attacks including intrusion attempts, viruses, worms, phishing, spyware, spam and many other types of malware. The Fortinet FortiGuard™ global 24x7 threat detection and update service provides the networking industry’s fastest response time to ensure latest security threats are detected and automatic security updates are available before your business is impacted.

Security Platforms That Meet the Challenge

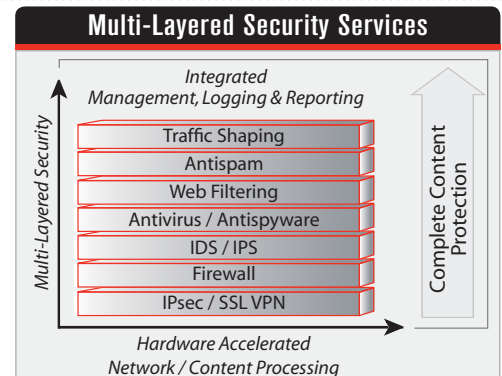

FortiGate security platforms are based on Fortinet’s revolutionary FortiASIC™ Content Processor technology, which enables a comprehensive suite of real-time security solutions while delivering the highest levels of network performance. The FortiGate-200-800 series platforms provide a complete security solution including content inspection firewall, IPSEC and SSL VPN, intrusion prevention, Web filtering, antispam, antivirus, antispyware, and IM and P2P controls that prevent blended attacks, as well as providing integrated traffic shaping functions, making them the most cost effective, convenient and powerful network protection solutions available. In addition, Fortinet’s per-device security subscriptions and turnkey appliance design makes them an affordable and easy-to-manage security solution for small-to-medium enterprises.

Key Problems	Solutions
<ul style="list-style-type: none"> Firewalls alone do not provide adequate protection against the ever changing cyber threats that are hidden inside the application layer 	Complete Unified Threat Management (UTM) security services that are automatically updated is required to fully protect the network and users from blended threats
<ul style="list-style-type: none"> Migration to web based or hosted applications requires a new level of application and content protection 	UTM system with hardware acceleration provides application level protection without impacting performance and the user experience
<ul style="list-style-type: none"> Deploying multiple point-products to address specific security needs are complex to manage and maintain and do not provide integrated protection 	Multi-layer UTM security solutions provided tightly integrated protection services with unified management, logging and reporting
<ul style="list-style-type: none"> Financial and government compliance requirements like SOX and FRCP requires comprehensive logging, reporting and data archiving 	Unified management, logging and reporting with a comprehensive and powerful toolset for analyzing, reporting and managing compliance

Fortinet’s Multi-Layered Security Solution

Fortinet’s multi-layered security solutions efficiently and economically provide an integrated set of security services in a single, easy-to-manage high-performance appliance that is capable of supporting a wide range of deployment scenarios. In addition, FortiGuard Subscription Services include everything from technical support, antivirus updates, antispyware, antispam, and Web content filtering to ensure that your security environment remains current and your corporate resources are protected against the latest blended threats. FortiGate systems come with a one-year limited hardware warranty and 90-day limited software warranty.

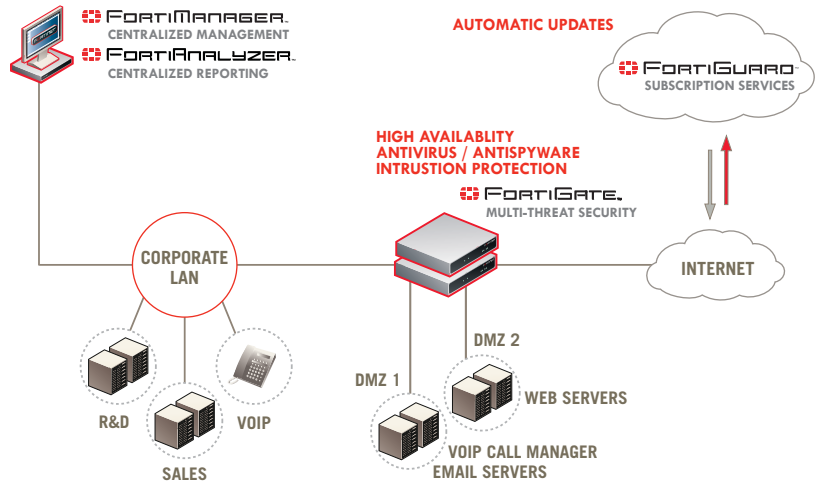

Fortinet's family of mid-range security appliances are designed for mid-size enterprise networks.

Secure Web Access

Firewall + Antivirus + Web Filtering

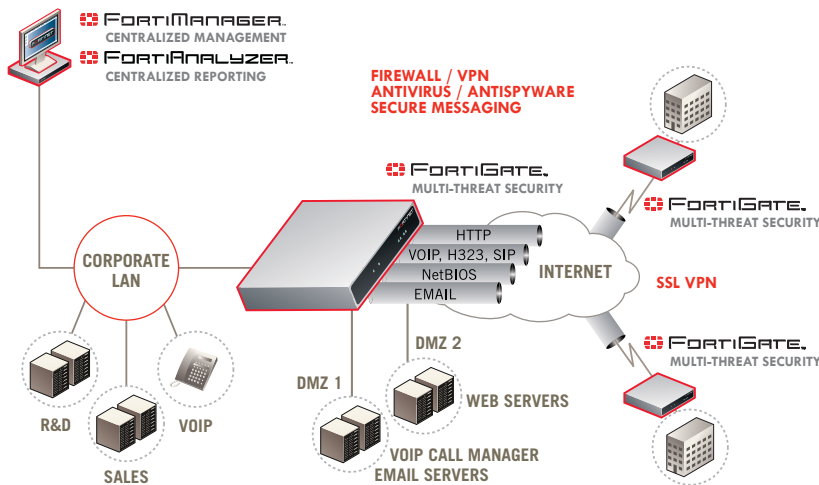

The primary source of threats to the Enterprise network is undoubtedly from uncontrolled employee access to the Internet and Web-based services. Yet today every business not only relies on the Internet for productivity enhancements and competitive advantage, but literally depends on the Internet for business success. With all the benefits of the Internet, also come potential risks such as viruses and worms that disrupt services or destroy valuable data, and a myriad of security challenges including information theft/leakage, inappropriate usage and the need to comply with regulatory mandates. The FortiGate-200-800 series of mid-range security appliances provide a turn-key suite of ICSA Labs certified multi-layered security applications to stop blended attacks from affecting your business.

Secure Perimeter Access

Firewall + VPN+ Intrusion Prevention + Antivirus

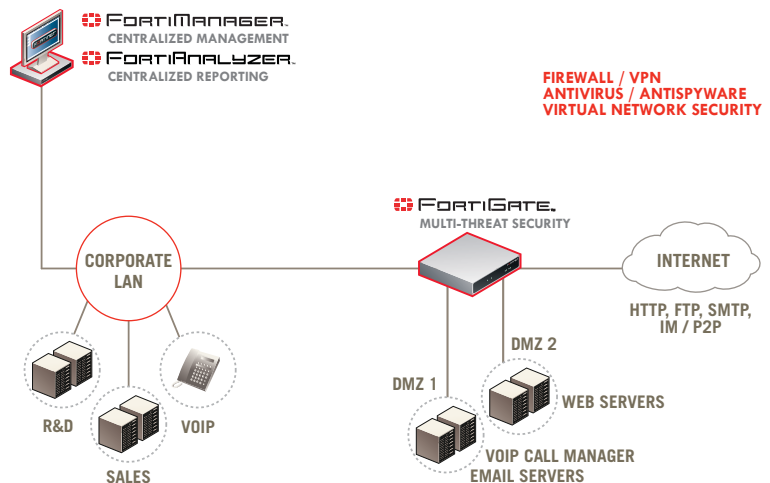

Enterprises often have complex network topologies and, therefore, complex network security requirements. Typical deployments mean linking several sites together—ranging from home offices to larger remote offices—and ensuring that the security implementation is seamless. Security devices for these environments need to provide a wide variety of performance metrics and connectivity options. Fortinet's line of mid-range security appliances offer integrated 4-port switches, 10/100/1000 Ethernet ports, up to 1 Gbps firewall throughput, and up to 200 Mbps 3DES VPN throughput. These options include the full security suite of ICSA Labs certified multi-layered security applications to stop blended attacks from affecting your enterprise's productivity.

Secure Messaging Access

Antispam+ Antivirus + IM / P2P Controls

The FortiGate line of security appliances has a flexible architecture that allows each one to quickly adapt to emerging technologies and threats such as IM, P2P, and VOIP applications and identity theft methods such as spyware, phishing, and pharming attacks. Flexible deployment options such as NAT, Route, and Transparent modes allow FortiGate devices to be easily deployed into most network designs. Core networking features, such as High Availability (HA) and support for dynamic routing protocols like RIP, OSPF, and BGP, allow them to be deployed into complex full mesh network environments that require maximum network availability.

Technical Specifications

HARDWARE SPECIFICATIONS	FortiGate-200A	FortiGate-224B	FortiGate-300A	FortiGate-400A	FortiGate-500A	FortiGate-800/800F
Total 10/100 Interfaces	8	26	4	4	8	4
Switch Interfaces	4	24	n/a	n/a	4	n/a
Configurable Ports	n/a	n/a	4	4	4	4
Fixed WAN / DMA Ports	2/2	2	n/a	n/a	n/a	n/a
Total 10/100/1000 Interfaces (Copper)	n/a	2 (switched)	2	2	2	4 (FG-800 only)
1Gb SFP Interfaces (Fiber)*	n/a	n/a	n/a	n/a	n/a	4 (FG-800F only)
* SX transceivers are standard; LX transceivers are available as an additional option.						
SYSTEM PERFORMANCE						
Firewall Throughput	150 Mbps	150 Mbps	400 Mbps	500 Mbps	600 Mbps	1 Gbps
VPN 3DES Throughput	70 Mbps	70 Mbps	120 Mbps	140 Mbps	150 Mbps	200 Mbps
Antivirus Throughput	30 Mbps	30 Mbps	70 Mbps	100 Mbps	120 Mbps	150 Mbps
IPS Throughput	100 Mbps	100 Mbps	200 Mbps	300 Mbps	400 Mbps	600 Mbps
Dedicated IPSec VPN Tunnels	200	200	1,500	2,000	3,000	3,000
Unlimited User Licenses	Yes	Yes	Yes	Yes	Yes	Yes
Concurrent Sessions	400,000	400,000	400,000	400,000	400,000	400,000
New Sessions/Second	4K	4K	10K	10K	10K	10K
Policies	2,000	2,000	5,000	5,000	8,000	20,000
* Antivirus performance is measured based on HTTP traffic with 32Kbyte file attachments and IPS performance is measured base on UDP traffic with 512 byte packet size. Actual performance may vary depends on network traffic and environment

CERTIFICATIONS	ICSA Labs: Firewall, IPSec, SSL, Antivirus, IPS (Please contact your Fortinet Sales Representative for a complete list of product certifications)					

Fortinet Unified Security Solutions

<ul style="list-style-type: none"> All-inclusive, cost-effective security solution 	Fortinet offers a lower total cost of ownership with the most complete set of functions including: antivirus, intrusion prevention, antispayware, web content filtering, and antispam
<ul style="list-style-type: none"> Automated updates of antivirus/antispayware and IPS security content 	Around-the-clock protection against the latest threats. Virus and intrusion encyclopedia covers more than 60,000 different threats
<ul style="list-style-type: none"> High performance custom hardware 	The Fortinet FortiASIC delivers superior performance and reliability, ensuring that the security appliance does not become a network bottleneck
<ul style="list-style-type: none"> Integrated multi-port switch 	Eliminates the need for external switches and provides enhanced connectivity options
<ul style="list-style-type: none"> Secure Web UI for easy deployment and management 	Quick and easy configuration wizard walks administrators through initial setup and graphical user interface offers at-a-glance security event and performance monitoring
<ul style="list-style-type: none"> Security hardened custom Operating System (OS) 	Underlying FortiOS™ is ICSA Labs-certified and offers a comprehensive command-line interface

Fortinet's ASIC-Based Advantage

FortiASIC is the foundation of Fortinet's unique hardware technology. FortiASIC is a family of purpose built, high-performance network and content processors that uses an intelligent proprietary content scanning engine and multiple algorithms to accelerate compute-intensive security services. FortiASIC provides the performance required to deliver enterprise and carriers-class UTM services. Coupled with the FortiOS security hardened Operating System, FortiASIC delivers extreme performance and security.

FortiOS: Developed for Security

FortiOS is the software foundation of FortiGate multi-threat security platforms. Developed solely for security, performance and reliability, it is a purpose-built operating system that leverages power of the FortiASIC content and network processors. FortiOS enables a comprehensive suite of security services – content inspection firewall, IPS, antivirus, web filtering, antispam, IM/P2P, virtual network security and bandwidth shaping. FortiOS is a complete suite of UTM security services and is certified for Common Criteria EAL 4+.

FortiGate-200-800 Series

FortiGate-200A

FortiGate -224B

FortiGate-300A

FortiGate-400A

FortiGate-500A

FortiGate-800/800F

FortiGate-200-800-series platforms provide the following security features:

FIREWALL

ICSA Labs Certified (Enterprise Firewall)
NAT, PAT, Transparent (Bridge)
Routing Mode (RIP v1 & v2, OSPF, BGP, & Multicast)
Policy-Based NAT
Virtual Domains (NAT/Transparent mode)
VLAN Tagging (802.1Q)
User Group-Based Authentication
SIP/H.323 NAT Traversal
WINS Support
Customized Protection Profiles

VIRTUAL PRIVATE NETWORK (VPN)

ICSA Labs Certified (IPSec & SSL)
PPTP, IPSec, and SSL
Dedicated Tunnels
DES, 3DES, and AES Encryption Support
SHA-1/MD5 Authentication
PPTP, L2TP, VPN Client Pass Through
Hub and Spoke VPN Support
IKE Certificate Authentication
IPSec NAT Traversal
Dead Peer Detection
RSA SecurID Support

INTRUSION PREVENTION SYSTEM (IPS)

ICSA Labs Certified (NIPS)
Protection From Over 3000 Threats
Protocol Anomaly Support
Custom Signature Support
Automatic Attack Database Update

ANTIVIRUS

ICSA Labs Certified (Gateway Antivirus)
Includes AntiSpyware and Worm Prevention
HTTP/SMTP/POP3/IMAP/FTP/IM and Encrypted VPN Tunnels
Automatic "Push" Virus Database Update
File Quarantine Support
Block by File Size or Type

WEB FILTERING

URL/Keyword/Phrase Block
URL Exempt List
Content Profiles
Blocks Java Applet, Cookies, Active X
FortiGuard Web Filtering Support

ANTISPAM

Real-Time Blacklist/Open Relay Database Server
MIME Header Check
Keyword/Phrase Filtering
IP Address Blacklist/Exempt List
Automatic Real-Time Updates From FortiGuard Network

TRAFFIC SHAPING

Policy-based Traffic Shaping
Differentiated Services (DiffServ) Support
Guarantee/Max/Priority Bandwidth

NETWORKING/ROUTING

Multiple WAN Link Support
PPPoE Support
DHCP Client/Server
Policy-Based Routing
Dynamic Routing (RIP v1 & v2, OSPF, BGP, & Multicast)
Multi-Zone Support with Routing Between Zones
Route Between Virtual LANs (VDOMS)

MANAGEMENT/ADMINISTRATION OPTIONS

Console Interface (RS-232)
WebUI (HTTP/HTTPS) and Command Line Interface
Telnet / Secure Command Shell (SSH)
Role-Based Administration
Multi-language Support
Multiple Administrators and User Levels
Upgrades and Changes Via FTP and WebUI
System Software Rollback
Central Management via FortiManager (optional)

LOGGING/MONITORING

Internal Logging
Log to Remote Syslog/WELF server
Graphical Real-Time and Historical Monitoring
SNMP
Email Notification of Viruses And Attacks
VPN Tunnel Monitor
Optional FortiAnalyzer Logging

USER AUTHENTICATION OPTIONS

Local Database
Windows Active Directory (AD) Integration
External RADIUS/LDAP Integration
IP/MAC Address Binding
Xauth over RADIUS for IPSEC VPN
RSA SecurID Support

VIRTUAL DOMAINS (VDOMs)

Separate Firewall/Routing domains
Separate Administrative domains
Separate VLAN interfaces
10 VDOMs (standard)

HIGH AVAILABILITY (HA)

Active-Active, Active-Passive
Stateful Failover (FW and VPN)
Device Failure Detection and Notification
Link Status Monitor
Link failover

INSTANT MESSENGER /

PEER-TO-PEER ACCESS CONTROL

AOL-IM Yahoo MSN
ICQ Gnutella BitTorrent
WinNY Skype eDonkey KaZaa

FortiGuard Security Subscription Services

With FortiGuard™ Security Subscription services enabled, customers can rest assured that their Fortinet security platforms are performing optimally and protecting their corporate assets with the latest security intelligence. FortiGuard services deliver the latest security content directly to Fortinet products. Fortinet offers four standard subscription services: Antivirus, Intrusion Prevention, Web Filtering and Antispam services to protect against multiple types of new and emerging threats. FortiGuard services are updated by the Fortinet Global Threat Research Team, a team of experts working around the clock and around the world to keep Fortinet customers secure. The Fortinet Global Threat Research Team enables Fortinet to deliver comprehensive multi-threat protection, including zero-day protection from new and emerging threats. The FortiGuard Network is a network of global data centers that automatically deliver updates quickly and reliably to Fortinet products.

For customers requiring guaranteed response time to suspicious malware threats, Fortinet offers a premier version of the FortiGuard Antivirus Security Subscription service. Along with Service Level Agreements (SLAs), the premier service provides the customer with a direct conduit to the Fortinet Global Threat Research Team.

Fortinet also offers a premier version of the FortiGuard Web Filtering Security Subscription service. This higher-tier service offering includes guaranteed SLAs and a larger quota for rating URLs submitted to the Fortinet Global Threat Research Team.

FortiCare Support Services

Includes:

- 24/7/365 FortiCare Web-based support
- 8x5 telephone-based technical support (24x7 - optional)
- 1-Year limited hardware warranty
- Technical account management service available
- Professional services available
- 90-day limited software warranty
